

Found Kittens?

If you've found kittens, here's what to do.

START HERE: Are the kittens injured or critically ill?

YES →

CALL our Field Services team at **(808) 356-2250**

↓ NO

Estimate the age of the kittens...

0-2 WEEKS OLD

Eyes closed or barely open

2-4 WEEKS OLD

Eyes open and alert; becoming mobile

4-6 WEEKS OLD

Very mobile and often talkative; can eat food

6-8 WEEKS OLD

Very active and playful; around 1-2 pounds

8+ WEEKS OLD

Very active and playful; 2 pounds or more

STOP! Can you see the mom cat?

YES ↓

NO ↓

DON'T KIT-NAP!

A kitten's best chance of survival is with mom. **Leave the kittens where they are.**

If you want to help, make sure mom has access to shelter, food, and water and contact a TNRM group to have mom and kittens spayed/neutered when ready.

ARE YOU SURE?

Mom may be off hunting or not want to come around if people are present. Watch for her to come back for a few hours.

PRO TIP: Leave a ring of flour around the kittens. Check in a few hours if you see mom's foot prints in the flour!

If the kittens are **healthy, friendly & social**, utilize social media and your personal network to try and place them in homes or email Admissions@HawaiianHumane.org to discuss admission to Hawaiian Humane.

Low cost spay/neuter services are available to the public at the Ginny Tiu Community Spay & Neuter Center! Make an appointment at HawaiianHumane.org/Spay-Neuter-FRC.

Without mom to care for them, kittens will require human intervention and will require round-the-clock care, including bottle-feeding. Hawaiian Humane can help to get you started by offering Kitten Kits at no cost. Visit HawaiianHumane.org/Kittens for where to pick up your kit!
